

Jacobs Douwe Egberts Ops BG is a Bulgarian subsidiary of JDE, the world's leading pure-play coffee and tea company, headquartered in The Netherlands, with leading brands in over 100 countries around the world and more than 16,000 employees. For more than 265 years, JDE has been inspired by the belief that it's amazing what can happen over a cup of coffee.

The Bulgarian operation comprises modern production facilities and a country-wide distribution network. The portfolio of products contains the number one Bulgarian brand in the grounded coffee segment, "Nova Brasilia". The brand is produced in the Kostinbrod plant and has been a market leader for almost 30 years. JDE Bulgaria exports its products in over 10 countries.

We are looking for bright and curious young engineering students or recent graduates to begin their professional journey as:

MANUFACTURING TRAINEE

The manufacturing trainee will support the best practices in the manufacturing organization by participating in continuous improvement in various manufacturing processes, by supporting the control/operating systems and the logic behind them, improving the flow of material and helping to adhere to cycle times.

You will work towards achieving the manufacturing goals and objectives of the organization. You will facilitate and support projects to reduce the costs significantly by implementing different tools and methodologies.

ESSENTIAL SKILLS AND ABILITIES

To make a successful career in the field of manufacturing / engineering, an individual should be adaptable to accept new changes in the respective fields and should remain well-informed with the latest developments happening in that field.

You should be well organized and should have the ability to identify problems and resolve them quickly. A self-driven person with positive attitude and result orientation is expected. Good analytical skills combined with teamwork skills and proficiency in computers would be beneficial.

You will use your academic knowledge to observe, support and take part in manufacturing / engineering processes by following these principles:

- Actively support various improvements and participate in creation of value analysis to reduce the costs in the engineering and manufacturing applications
- Assist in improving the manufacturing processes
- Support engineering team with any ongoing projects
- Actively participate in M&R activities
- Ensure increased efficiency and quality and make recommendations
- Actively work in developing your teamwork abilities and focus on improving people management skills

REQUIRED EXPERIENCE & COMPETENCIES

- No previous experience in manufacturing is required

- University degree or about to graduate, ideally in a technical / engineering field
- Organization skills and capabilities to handle multiple tasks
- Fluent or very good command of English
- PC proficiency (MS office as a minimum)

THE COMPANY OFFERS:

- Up to 18 months traineeship with options for a permanent position upon completion
- Attractive monthly remuneration
- Additional health insurance and benefits package
- On-site canteen with a significant discount for employees
- Quarterly free company products
- Organized transport to and from the production facility
